There was no music, no reception and no wedding feast, more than that comprehended in the breaking of a bottle of old Madeira, in the health and happiness of the newly over The bride wore the gown and the bridal veil that she had intended to wear at the much larger wedding planned to take place in the Church of the Epiphany to-morrow afternoon. The gown was of white satin, with a train and a guimpe of white tulle, the skirt being draped

Mrs Price will live at Mr Price's residence, 154
West Fifty-eighth street.

Among those present as guests at the wedding were three of those chosen by Mr Price to act as his ushers at the wedding that was to have taken place in the church. These were Capt. John B Bellinger, Assistant Quartermaster, U. S. A. Frankin A. Plummer and DeWitt Parshall. The other usher, Cyrus Hall McCormick of Chicago, was not present, and no member of the firm of Price, McCormick & Co. except those named. Other guests present were Mrs. Algernon Sidney Sullivan, whose late husband was the senior member of the law firm of Sullivan & Cromwell, one of whose members, William J. Curtis, is assignee of Price, McCormick & Co., and another, William Nelson Cromwell, is the assignee's counsel; George Hamilton Sullivan, Mr. and Mrs. Eugene D. Hawkins, Mrs. DeWitt Parshall, Mr. and Mrs. Potter and Miss Daisy Potter, Mr and Mrs. Hyde and Miss pyde, and C. D. Freeman.

Palph Graham Montague Stuart-Wortley, one

bu and said

"I am all at sea in this matter. It is the first intimation of the affair I have heard and I am unable to say anything at present as I do not know the details. I have just returned from a visit to my brother, who was one of the belenguered garrison at Ladysmith. He was sent home suffering from dystentery and a wound in the eye caused by a splinter thrown by a bullet. I must ask you to excise me from type-

of the firm.

It was learned yesterday that the capital of the firm was \$1,500,000, divided as follows: Theodore H. Price and George Crocker, \$500,-600 each William G McCormick and R. G. M. Stuart-Wortley, \$250,000 each Walter W. Itice's interest was included in that of his brother. The undivided profits of his brother. The undivided profits of his brother. The undivided profits of the the firm before the break was estimated at \$1,000,000. This statement was supplemented by the additional one that only a small part of the collateral heid by the firm was sold out on the stock Exchange underlithe rule. It was said that the collateral unsold amounts to between 300,-600 and 400,000 shares of stocks valued at about \$12,000,000. These stocks are held by banks all over the country. The loans made to the firm by New York banks are estimated at about \$4,000,000. Most of these are time loans. Mr. Cromwell said yesterday that the disposition on

FOR THE MORRIS-CLARK WEDDING. St. Thomas's Church to Be Decorated in Most Elaborate Manner.

Dr. and Mrs. Everett M. Culver gave a supper last night at their apartment, 175 West Fifty-eighth street, following the rehearsal for wedded were pledged after the ceremony was the wedding of Miss Katherine Clark, daughter of William H. Clark of Montana, and Dr. Lewis Rutherford Morris. The guests of Dr. and Mrs. Culver, the latter a sister of the bride elect, included Miss Christine Pomeroy of California, and Miss Mai Pfonts of Butte City, Mon., William M. Harriman, William Clark Jr., Dr. Charles Thorndyke Parker, Newbold

leaguered garrison at Ladysmith. He was such thome suffering from dystentery and a wound in the eye caused by a splinter thrown by a bullet. I must ask you to excuse me from give in gany statement about business."

At the Cunard rier Mr. Stuart Wortley was met by Walter W. Price of the firm and C. D. Freeman Mr. Price gave his partner some of the details of the failure and Mr. Stuart Wortley went with Mr. Price and Mr. Stuart Wortley went with Mr. Price and Mr. Freeman to the office of the firm. He remained there a short time, and then went to his residence, 55 West Sixty-cighth street, where he remained the reast of the day. He did not go to his partner's wedding.

Walter Price was asked what Mr. Wortley said.

"What could he say?" answered Mr. Price interoratively "There was nothing to say. It was the old game and we were up against it. There isn't much that a man can say."

The was and nays were called and this resolutions were not properly before the house. Mr. Hammil then read a resolution appointing the district committee for the ensuing year. The ayes and nays were called and this resolutions were not properly before the house. Mr. Hammil then read a resolution special to the confusion by protesting against that the charman proposed to gag a free expression of views. He asked that the Powers charged him with "gag rule" he was entired. Chairman Barnum replied that the resolutions of Mr. Dempsey moved that the read that the read to have a content of the confusion by protesting against what he termed "ray rule." He say d. Mr. Dempsey's resolution had been seed to be a content of the confusion by protesting against what he termed "ray rule." He say d. Mr. Dempsey is resolution had been seed to be a confusion by protesting against what he termed "ray rule." He say d. Mr. Dempsey is resolution had been seed to be a confusion by rule with the charman proposed to gag a free expression of views. He

neited through hatred of Great Britain and Canada to commit the crime, and that their entence is a just one for the act and wisely imposed as a warning to any who may in future ontemplate similar outrages against Canada. A remarkable feature of the case which anded the three men in the penitentiary to-day was that the attempt on the Welland Canal locks was made only five weeks ago. The swift administration of justice in the case is the subject of general comment.

The prisoners were very despondent when they started for the Kingston penitentiary this morning. They were in charge of a posse of police, were heavily chained and closely guarded. The reason was that before the trial there was talk of their being rescued by sympathizers from across the border, and the militia were turned out to guard the fail.

Dullman was shackled to Walsh and Nolin was chained to an Italian wife murderer named Werke, who was sentenced for len years. Dullman had expected to kei off and the others hoped to get fifteen-year sentences. They were very despondent to-day.

Walsh said he had been pressman and general mechanic in the Dubhan Enterprise and Free-man's Journal, and that he had a wife and three children in Ireland. He refused to speak of his life on this side of the Atlantic.

Nolin, when interviewed, asked eagerly about the other two prisoners. He was loyal to his chief. He thought Dullman received scanty consideration and said that if he had thought it would have done him any good he would have testified in his behalf.

Dullman suffered acutely. He has aged ten years since sentence was pronounced last night. He was nervous and excitable, and blaned himself for hampering the work of his coursel.

"I have a wife and family over in the States," he exclaimed. "As far as they are concerned it would have been better if I had been hanged. I have no hope of pardon, for I will die before i serve ten years."

Dullman refused to go into the box on his Dullman refused to go into the box on his Dullman refused to go into the box on his was that the attempt on the Welland Canal locks was made only five weeks ago. The

SPECIAL ECLIPSE PORECAST.

Partly Cloudy to Clear Weather Probable A cording to the Weather Bureau. WASHINGTON, May 26.-The Weather Bureau to-night issued the following special colipse

East to south and southeast winds, with higher temperature, are indicated for Monday morning over the path from which a total eclipse of the sun will be visible. An exact forecast of the cloud conditions at that time, however, cannot now be made, but it is fairly probable that partly cloudy to clear weather will obtain. As the district where the major portion of the observations is to be taken is nearly four hundred miles in length, it is very probable that they can be successfully made over the larger part of it. Further special forecasts will be issued on Sunday at 10 A. M. and 2 P. M.

LICK OBSERVATORY'S FORCE.

Prof. Campbell All Ready for Observations at Thomaston liis Instruments.

THOMASTON, Ga., May 26.—The Lick Observaory expedition from Mount Hamilton, Cal. stationed here to view the solar eclinge, has completed all preparations and the men are

completed all preparations and the men are now ready to make their observations. All their instruments, consisting of eleven large photographic telescopes, the largest being forty feet in length, and four large photographic spectroscopes and a chronoueter sextant, and many other minor pieces of apparatus are in position and ready for use.

The station here is about two hundred yards from the public square of the town and is a few yards from the exact centre of totancy. Frof. W. W. Campbell, se dor astronomer of Lick Observatory, is in charge of the expedition and has been several weeks making preparations. His assistants have all arrived and are well trained for their work. His chief assistant is Prof. C. D. Persine, also of Lick Observatory. The other assistants are from tiolland and from various observatories in the United States.

SUN'S ECLIPSE TO-MORROW. WILL DARKEN THE MORNING EVEN

HERE, OUT OF THE TOTAL BELT. Interlaced Crescents in the Shadows-Strange Things That Happen on Earth Where the San's Whole Face Is Darkened - The

Black Moon and the Luminous Crown. Rain or shine, with nineteen-twentieths of the sun's orb obscured by the moon at 9 o'clock tomorrow morning in New York, it ought to be pretty nearly dark enough to send suburban chickens back to roost. If the skies are clear, one peculiar effect of the eclipse in this region will be under everybody's eyes. Wherever the morning sunshine comes through foliage against a wall or upon a sward sloping to the southeast in such a way that on ordinary days there are circular dapples of light overlapping instead of the dapples interlaced crescents the multitudinous imperfect images of the luminous edge of the sun. The interstices of the foliage have the effect of the lens of a camera, and reproduce many little suns in the shide: circular when they are images of the full orb, but of the shape of the new moon when a partial eclipse leaves only a crescent on the sun's disc

It is the belt in which the eclipse is total that interests astronomers. The track of the total eclipse on this con tinent crosses northern Mexico and passes northeasterly across the United States from New Orleans to Norfolk. There will also be a total eclipse in western Portugal and Aigiers and the end will be at sunset in the region of the Red Sea. Astronomers and sightseen from all over this country and various parts of path of the total shadow to make observations and the indications are that with fair weather there will be more complete and valuable obser-
